TRACK RECORD MATTERS

Global Financial Crisis (2008 – 2012)

We believe our outperformance in the Global Financial Crisis was driven by:

- . Our sector-leading demographics \rightarrow consumers in our markets were better able to absorb the recession's impact
- The quality of our tenancy
- . The quality of our assets
- . The strength of our balance sheet

During the Global Financial Crisis, we outperformed our peers in FFO per share growth, same-store growth, and leased rate, among various other metrics

FFO Per Share Growth Same-store growth ■ FRT ■ Peer Avg. FRT excl. Redev ■ Peer Avg. 7.7%7.3% 7.5% 1.2% -0.5%-0.3% -33.2% 2009 2010 2011 2012 2008 2009 2011 2012

COVID-19 Pandemic

- Disproportionally affected by COVID-19 due to stricter and longer government shutdowns and mandates in our markets
- Resilient higher-demographic markets have led to a strong bounce back

Inflationary Environment with Potential Recession

- Inflation and recession risks expected to impact retail differently than COVID-19 pandemic
- Higher income demographic markets with higher income customers should be less impacted
- Stronger demographics around our properties should support better performance through inflation and recession
