Safe Harbor Language

Certain matters discussed within this Supplemental Information may be deemed to be forward-looking statements within the meaning of the federal securities laws. Although Federal Realty believes the expectations reflected in the forward-looking statements are based on reasonable assumptions, it can give no assurance that its expectations will be attained. These factors include, but are not limited to, the risk factors described in our Annual Report on Form 10-K filed on February 11, 2021 and subsequent quarterly reports on Form 10-Q, and include the following:

- *risks that our tenants will not pay rent, may vacate early or may file for bankruptcy or that we may be unable to renew leases or re-let space at favorable rents as leases expire;*
- *risks that we may not be able to proceed with or obtain necessary approvals for any redevelopment or renovation project, and that completion of anticipated or ongoing property redevelopment or renovation projects that we do pursue may cost more, take more time to complete or fail to perform as expected;*
- *risk that we are investing a significant amount in ground-up development projects that may be dependent on third parties to deliver critical aspects of certain projects, requires spending a substantial amount upfront in infrastructure, and assumes receipt of public funding which has been committed but not entirely funded;*
- *risks normally associated with the real estate industry, including risks that occupancy levels at our properties and the amount of rent that we receive from our properties may be lower than expected, that new acquisitions may fail to perform as expected, that competition for acquisitions could result in increased prices for acquisitions, that costs associated with the periodic maintenance and repair or renovation of space, insurance and other operations may increase, that environmental issues may develop at our properties and result in unanticipated costs, and, because real estate is illiquid, that we may not be able to sell properties when appropriate;*
- *risks that our growth will be limited if we cannot obtain additional capital;*
- *risks associated with general economic conditions, including local economic conditions in our geographic markets;*
- *risks of financing on terms which are acceptable to us, our ability to meet existing financial covenants and the limitations imposed on our operations by those covenants, and the possibility of increases in interest rates that would result in increased interest expense;*
- *risks related to our status as a real estate investment trust, commonly referred to as a REIT, for federal income tax purposes, such as the existence of complex tax regulations relating to our status as a REIT, the effect of future changes in REIT requirements as a result of new legislation, and the adverse consequences of the failure to qualify as a REIT; and*
- *risks related to natural disasters, climate change and public health crises (such as the outbreak and worldwide spread of COVID-19), and the measures that international, federal, state and local governments, agencies, law enforcement and/or health authorities implement to address them, may precipitate or materially exacerbate one or more of the above-mentioned risks, and may significantly disrupt or prevent us from operating our business in the ordinary course for an extended period.*

Given these uncertainties, readers are cautioned not to place undue reliance on any forward-looking statements that we make, including those in this Supplemental Information. Except as required by law, we make no promise to update any of the forward-looking statements as a result of new information, future events, or otherwise. You should review the risks contained in our Annual Report on Form 10-K, filed with the Securities and Exchange Commission on February 11, 2021 and subsequent quarterly reports on Form 10-Q.

Notes:

- See Glossary of Terms.
- For the three and six months ended June 30, 2021 and 2020, dividends on our Series 1 preferred stock were not deducted in the calculation of FFO available to common shareholders, as the related shares were dilutive and included in "weighted average common shares, diluted."
- For the three months ended June 30, 2020, income attributable to operating partnership units is not added back in the calculation of FFO available to common shareholders, as the related shares are not dilutive and are not included in "weighted average common shares, diluted" for this period. For the three months ended June 30, 2021 and 2020 and the six months ended June 30, 2020, the weighted average common shares used to compute FFO per diluted common share includes operating partnership units that were excluded from the computation of diluted EPS. Conversion of these operating partnership units is dilutive in the computation of FFO per diluted share but is anti-dilutive for the computation of dilutive EPS for these periods.
- Amounts reflect the components of "net income attributable to noncontrolling interests," but exclude "income attributable to operating partnership units."

COVID-19 Collectibility Related Impacts
June 30, 2021

The following provides supplemental information regarding our collectibility related impacts resulting from COVID-19 for the three months ended June 30, 2021. The primary drivers of our collectibility impacts in the quarter are from tenants who we account for on a cash basis or converted to a cash basis of accounting during the quarter, as we did not receive full contractual rent payments, as well as COVID-19 related rent abatements. We change a tenant to a cash basis of accounting when we determine collection of substantially all lease payments during the lease term is not considered probable; revenue is then limited to the lesser of revenue recognized under accrual accounting or cash received. Our full revenue recognition policy with respect to leases can be found in Note 2 of our December 31, 2020 Annual Report on Form 10-K.

Comparable Property Information
June 30, 2021

The following information is being provided for "Comparable Properties." Comparable Properties represents our consolidated property portfolio other than those properties that distort comparability between periods in two primary categories: (1) assets that were not owned for the full quarter in both periods presented and (2) assets currently under development or being repositioned for significant redevelopment and investment. The assets excluded from Comparable Properties in Q2 include: Assembly Row Phase 3, Cocowalk, Darien Commons, Pike & Rose Phase 3, Freedom Plaza, and all properties acquired or disposed of from Q2 2020 to Q2 2021. Comparable Property property operating income ("Comparable Property POI") is a non-GAAP measure used by management in evaluating the operating performance of our properties period over period. However, given the impacts of COVID-19, management believes this metric is less relevant in the current environment, and is not necessarily indicative of our results.

Notes:

- 1) The "maturities" and "weighted average rate" reflect the prepayment at par of two of our mortgage loans in 2021, as compared to their stated maturity date in 2022, as referenced on page 15.
- 2) On April 16, 2021, we repaid \$100.0 million of the term loan, amended the agreement on the remaining \$300.0 million, to lower the current spread over LIBOR from 135 basis points to 80 basis points based on our current credit rating, and extended the initial maturity date to April 16, 2024, along with two one-year extensions, at our option.
- 3) The total debt maturities differ from the total reported on the consolidated balance sheet due to the debt issuance costs and unamortized net premium/discount and on certain mortgage loans, notes payable, and senior notes as of June 30, 2021.
- 4) The weighted average rate reflects the weighted average interest rate on debt maturing in the respective year.

Notes:

- (1) There is no guarantee that the Trust will ultimately complete any or all of these opportunities, that the Projected Return on Investment (ROI) or Projected Costs will be the amounts shown or that stabilization will occur as anticipated. The projected ROI and Projected Cost are management's best estimate based on current information and may change over time.
- (2) Projected ROI for redevelopment projects generally reflects only the deal specific cash, unleveraged incremental Property Operating Income (POI) generated by the redevelopment and is calculated as Incremental POI divided by incremental cost. Incremental POI is the POI generated by the redevelopment after deducting rent being paid or management's estimate of rent to be paid for the redevelopment space and any other space taken out of service to accommodate the redevelopment. Projected ROI for redevelopment projects generally does not include peripheral impacts, such as the impact on future lease rollovers at the property or the impact on the long-term value of the property but may for certain property improvement projects.
- (3) Stabilization is generally the year in which 90% physical occupancy of the redeveloped space is achieved. Economic stabilization may occur at a later point in time.
- (4) All subtotals and totals reflect cost weighted-average ROIs.
- (5) Project formerly known as Jordan Downs Plaza. Cost to date and projected cost are net of the proceeds we will receive from our New Market Tax Credit structure. See Note 3 of our December 31, 2019 Form 10-K for additional information. Stabilization has been impacted by the COVID-19 pandemic.
- (6) Property improvements projects generally consist of façade renovations, site improvements, landscaping, improved outdoor amenity spaces, and other upgrades to improve the overall look and environment of the property. These projects improve overall tenant and customer experiences, improve market rents, drive leasing demand, and/or provide outdoor spaces critical to meeting the needs of the current environment. Returns on these projects are typically seen over one to five years, however, some projects could extend beyond that. Projected ROI range reflects management's best estimate of the long term expected return on cost of these investments.

- (1) Anticipated opening dates, total cost, and projected return on investment (ROI) are subject to adjustment as a result of factors inherent in the development process, some of which may not be under the direct control of the Company. Refer to the Company's filings with the Securities and Exchange Commission on Form 10-K and Form 10-Q for other risk factors.
- (2) Projected ROI for development projects reflects the unleveraged Property Operating Income (POI) generated by the development and is calculated as POI divided by cost.
- (3) Projected costs for Assembly Row and Pike & Rose include an allocation of infrastructure costs for the entire project. Phase I of Santana West includes an allocation of infrastructure for the Santana West site.
- (4) Federal Realty Investment Trust is leasing 45,000 square feet of office space at a market rent in Pike & Rose Phase III, which delivered in August 2020. Revenue related to this rent will be eliminated in the consolidated financial statements.

Future Redevelopment Opportunities
June 30, 2021

We have identified the following potential opportunities to create future shareholder value. Executing these opportunities could be subject to government approvals, tenant consents, market conditions, etc. Work on many of these new opportunities is in its preliminary stages and may not ultimately come to fruition. This list will change from time to time as we identify hurdles that cannot be overcome in the near term, and focus on those opportunities that are most likely to lead to the creation of shareholder value over time.

Pad Site Opportunities - Opportunities to add both single tenant and multi-tenant stand alone pad buildings at existing retail properties. Many of these opportunities are "by right" and construction is awaiting appropriate retailer demand.

Escondido Promenade	Escondido, CA	Pan Am	Fairfax, VA
Federal Plaza	Rockville, MD	Pike 7 Plaza	Vienna, VA
Fresh Meadows	Queens, NY	Sylmar Towne Center	Sylmar, CA

Bethesda Row	Bethesda, MD	Hastings Ranch Plaza	Pasadena, CA

Glossary of Terms

EBITDA for Real Estate ("EBITDAre"): EBITDAre is a non-GAAP measure that the National Association of Real Estate Investment Trusts ("NAREIT") defines as: net income computed in accordance with GAAP plus net interest expense, income tax expense, depreciation and amortization, gain or loss on sale of real estate, impairments of real estate and change in control of interest, and adjustments to reflect the entity's share of EBITDAre of unconsolidated affiliates. We calculate EBITDAre consistent with the NAREIT definition. As EBITDA is a widely known and understood measure of performance, management believes EBITDAre represents an additional non-GAAP performance measure, independent of a company's capital structure, that will provide investors with a uniform basis to measure the enterprise value of a company. EBITDAre also approximates a key performance measure in our debt covenants, but it should not be considered an alternative measure of operating results or cash flow from operations as determined in accordance with GAAP. The reconciliation of net income to EBITDAre for the three and six months ended June 30, 2021 and 2020 is as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
	(in thousands)			
Net income	\$ 48,059	\$ 10,859	\$ 97,798	\$ 67,300

Funds From Operations (FFO): FFO is a supplemental measure of real estate companies' operating performances. NAREIT defines FFO as follows: net income, computed in accordance with GAAP plus real estate related depreciation and amortization, gains and losses on sale of real estate, and impairment write-downs of depreciable real estate. NAREIT developed FFO as a relative measure of performance and liquidity of an equity REIT in order to recognize that the value of income-producing real estate historically has not depreciated on the basis determined under GAAP. However, FFO does not represent cash flows from operating activities in accordance with GAAP (which, unlike FFO, generally reflects all cash effects of transactions and other events in the determination of net income); should not be considered an alternative to net income as an indication of our performance; and is not necessarily indicative of cash flow as a measure of liquidity or ability to pay dividends. We consider FFO a meaningful, additional measure of operating performance primarily because it excludes the assumption that the value of real estate assets diminishes predictably over time, and because industry analysts have accepted it as a performance measure. Comparison of our presentation of FFO to similarly titled measures for other REITs may not necessarily be meaningful due to possible differences in the application of the NAREIT definition used by such REITs.

Property Operating Income: Rental income and mortgage interest income, less rental expenses and real estate taxes.

Overall Portfolio: Includes all operating properties owned in reporting period.

Comparable Properties: Represents our consolidated property portfolio other than those properties that distort comparability between periods in two primary categories: (1) assets that were not owned for the full quarter in both periods presented and (2) assets currently under development or being repositioned for significant redevelopment and investment. Comparable property growth statistics are calculated on a GAAP basis.

Annualized Base Rent (ABR): Represents aggregate, annualized in-place contractual (defined as rents billed on a cash basis without taking the impact of rent abatements into account) minimum rent for all occupied spaces as of the reporting period.

Retail Leasing Summary - Lease Rollover Calculation: The rental increases associated with comparable spaces generally include all leases signed for retail space in arms-length transactions reflecting market leverage between landlords and tenants during the period. The comparison between average rent for expiring leases and new leases is determined by including contractual rent on the expiring lease and annual market rent and in some instances, projections of percentage rent, to be paid on the new lease. In atypical circumstances, management may exercise judgement as to how to most effectively reflect the comparability of rents reported in the calculation. As a result of accommodations made to certain tenants to help them stay open during and after the COVID-19 pandemic, we have found it necessary to exercise more judgement in 2020 and 2021 than in prior years in order to appropriately reflect the comparability of rents in the calculation. The change in rental income on comparable space leases is impacted by numerous factors including current market rates, location, individual tenant creditworthiness, use of space, market conditions when the expiring lease was signed, capital investment made in the space and the specific lease structure. Rent abatement and short term rent restructuring agreements that are a result of COVID-19 impacts are not included in this calculation.

Tenant Improvements and Incentives: Represents the total dollars committed for the improvement (fit-out) of a space as it relates to a specific lease. Incentives include amounts paid to tenants as an inducement to sign a lease that do not represent building improvements.
